#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☒ Responsive to communication(s) filed on 26 October 2006.
- 2a) ☐ This action is FINAL.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114 was filed in this application after appeal to the Board of Patent Appeals and Interferences, but prior to a decision on the appeal. Since this application is eligible for continued examination under 37 CFR 1.114 and the fee set forth in 37 CFR 1.17(e) has been timely paid, the appeal has been withdrawn pursuant to 37 CFR 1.114 and prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 10/26/2006 has been entered.

***Response to Arguments***

2. Applicant's arguments, see Appeal Brief, filed 10/26/2006, with respect to the rejection(s) of claim(s) 1-26 and 57 under Miller et al. in view of Grindstaff et al. have been fully considered and are persuasive. The prior art of Record failed to teach the use of a first denier with a first luster component and a second denier with a second luster component. Therefore, the rejection has been withdrawn.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-26 and 57 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cobb et al. (US 3,608,297) in view of Miller et al. (US 2003/0165656).

a. Cobb et al. teach a polyamide yarn suitable for use in carpets comprising 85% of filaments containing 1% titanium dioxide and 15% of filaments containing 0.02%

titanium dioxide (col. 2, lines 12-14). The polyamide yarns may be nylon (Table 1). The filaments of each titanium dioxide group may have different denier (claim 8). The applied invention teaches the use of 12 denier fibers (Table 5). The invention of Cobb et al. is silent as to the use of binder fibers.

b. Miller et al. teach a carpet fiber and binder material comprising binder fibers of nylon 6, nylon 66, and nylon 12 [0023] and carpet fibers of denier of at least 1 and may be made of polyester [0021]. The carpet fibers may include additives such as pigments, dyes and optical brighteners [0021]. The carpet fibers are staple fibers [0003] and the invention more preferably comprises 1-5 weight percent binder fibers [0035].

c. Since Cobb et al. and Miller et al. are from the same field of endeavor (i.e. nylon carpet fibers), the purpose disclosed by Miller et al. would have been recognized in the pertinent art of Cobb et al.

d. It would have been obvious at the time the invention was made to a person having ordinary skill in the art to have added the binder fibers to the invention of Cobb et al. with the motivation of having all the benefits of staple fiber with the benefits of continuous filament yarn carpet as disclosed by Miller et al. [0014].

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Matthew D. Matzek whose telephone number is (571) 272-2423. The examiner can normally be reached on 8:30 am - 5:00 pm.
